

Zero-emission road transport: Funding the ZEV transition

Monday, 9 December, 12:00-13:00
UK Pavilion (Building 8)

The national and sub-national governments of the ZEV Alliance have set strong targets for electric vehicles as a tool to meet climate goals, but face challenges from finite budgets and strong competition among many priorities. Building on the ZEV Alliance's [2019 focus area research](#), this event will showcase the many ways that ZEV Alliance governments are supporting sustainable, long-term ZEV growth.

This one-hour event will include perspectives and discussion from high-level representatives of the following ministries and organizations:

- UK Office for Low Emission Vehicles (OLEV)
- British Columbia Ministry of Environment and Climate Change Strategy
- Québec Ministry of Sustainable Development, Environment, and the Fight Against Climate Change
- California Environmental Protection Agency
- Netherlands Ministry of Infrastructure and Water Management
- German Corporation for International Cooperation (GIZ)

All speakers subject to change. For questions, contact Dale Hall of the ZEV Alliance Secretariat at d.hall@theicct.org. For more information on the ZEV Alliance, visit www.zevalliance.org.
